this first issue in the series contains nine articles written by leading british and american experts from the mining industry regulatory authorities and academia and incorporates the latest research following an introductory overview of many of the issues of current concern to the field the book deals with a wide variety of topics ranging from the environmental impact of gold mining in the brazilian amazon through the issues relevant to coal mining vegetative and other remediation strategies and procedures and water pollution to a thorough analysis of environmental management and policy initiatives the issues raised in mining and its environmental impact may point the way to future solutions to the economic technological and

environmental problems associated with mining in all its aspects and make this volume key reading for practitioners and researchers in the field as well as for environmentalists generally

this book is not designed to be an exhaustive work on mine wastes it aims to serve undergraduate students who wish to gain an overview and an understanding of wastes produced in the mineral industry an introductory textbook addressing the science of such wastes is not available to students despite the importance of the mineral industry as a resource wealth and job provider also the growing importance of the topics mine wastes mine site pollution and mine site rehabilitation in universities research organizations and industry requires a textbook suitable for undergraduate students until recently undergraduate earth science courses tended to follow rather traditional lines focused on the teaching of palaeontology crystallography mineralogy petrology stratigraphy sedimentology structural geology and ore deposit geology however today and in the future earth science teachers and students also need to be familiar with other subject areas in particular earth science curriculums need to address land and water degradation as well as rehabilitation issues these topics are becoming more important to society and an increasing number of earth science students are pursuing career paths in this sector mine site rehabilitation and mine waste science are examples of newly emerging disciplines this book has arisen out of teaching mine waste science to undergraduate and graduate science students and the frustration at having no appropriate text which documents the scientific fundamentals of such wastes

this report prepared by the commission on development and environment for amazonia at the initiative of the amazon cooperation treaty and supported by the inter american development bank and the united nations development programme is based on the concept of an amazonia that exists above and beyond the world of fantasy and myth an amazonia of flesh and blood of human toil of human history of human faces and hopes and future human beings it is an analysis based not only on the experiences and technologies of today's world but also and with greater emphasis on the wisdom accumulated for centuries by amazonia itself standing amazonia the amazon region has the largest area of tropical forest on the planet and concern for its environmental deterioration extends well beyond the borders of the eight countries that form a part of it with support from the idb and undp the commission on development and environment for amazonia prepared this report that provides data on the region's natural resources population health and infrastructure
